

MAFA AgriCracker AC100

AGRICULTURE

MAFA AgriCracker AC100 is an efficient and quiet structural crusher for all types of grain. Sturdy construction with most of the components in stainless steel. The cone-shaped rollers provide a compact, wear-resistant machine and a very efficient decomposition without heat generation and with a minimal proportion of flour.

Accessories

Height adjustable, stand in galvanized steel, inlet funnels, magnetic trap, screen cleaner, rotation sensor, pre-crusher, sampling unit and automatically adjustable disc spacing.

Technical information

AC100	
Measurement	1070 x 475 x 400 mm (without stand)
Weight	ca 200 kg
Effect	5,5 kW
Capacity	Up to 3 ton/h (depending on material)
Height below outlet RK160 with stand:	300 – 700 mm
Height to inlet Q16 with stand:	1065 – 1465 mm
