

# MAFA AgriCracker AC200

AGRICULTURE

**MAFA AgriCracker AC200** is an efficient and quiet structural crusher for all types of grain. Sturdy construction with most of the components in stainless steel. The cone-shaped rollers give one compact, wear-resistant machine and provides a very efficient decomposition of the material without heat generation and with a minimal proportion of flour.

## Accessories

Height adjustable, stand in galvanized steel, inlet funnels, magnetic trap, screen cleaner, rotation sensor, pre-crusher, sampling unit and automatically adjustable disc spacing.

## Technical information

AC200	
Measurement	1020 x 740 x 530 mm (chassis crush)
Weight	ca 365 kg (without accessories)
Effect	11 kW
Capacity	Up to 5 ton/h (depending on material)
Height below outlet RK200 with stand:	465 - 865 mm
Height to inlet Q16 with stand:	1360 - 1760 mm
