

MAFA Succé BIO

- for storage and handling of wood pellets

MAFA Succé BIO

is a highly flexible silo solution for storing wood pellets. The silo is module built and can be easily extended both in height and length. It has a low design and is equipped with a smart, self emptying bottom section that is gentle on the pellets.

- **Bottom cone without shutter**
- **Emptying through an offset auger box that produces a more smoothly running Maflex auger**
- **Reinforced end sections**
- **Smaller number of bolts**
- **Faster to assemble**

MAFA Succé BIO is manufactured in a steel sheet coated with aluminium and zinc, which means that it is also suitable for outdoor use. The plates have drip edges and bolts, which makes it easy to assemble. The silo is available in four lengths and five heights, which meets most requirements.

MAFA Succé BIO 330 with a volume of 14,1 m³.

The emptying auger for MAFA Succé BIO is a Maflex 90/75 flex auger. The cone, flex auger and auger outlet is designed to ensure that emptying is gentle on the pellets. The transport auger's energy consumption is also considerably lower.

| Number of sektion | 2 | 3 | 4 | 5 |
|-------------------------|------|------|------|------|
| Length mm. | 2460 | 3690 | 4920 | 6150 |
| Width mm. | 1883 | 1883 | 1883 | 1883 |
| Volume i m ³ | | | | |
| Height mm. | | | | |
| 1843 | 5,2 | 7,9 | 10,6 | 13,3 |
| 2330 | 7,3 | 11,0 | 14,8 | 18,5 |
| 2803 | 9,3 | 14,1 | 18,9 | 23,7 |
| 3283 | 11,4 | 17,2 | 23,1 | 29,0 |
