

MAFA XB is our biggest silo that can store up to 189 m³. A Swedish-made silo with a stabil construction. It is made of high-quality steel sheet coated with aluminium and zinc. A quality sheet with longer durability compared to, for example, galvanized sheet. The silo has a smooth inside which means that it empties well.

We provide a 10-year material warranty against rusting on our factory-fitted MAFA Big. The silo is designed to handle loads of up to 750 kg/m³ and can be adapted for higher volume weights.

Advantages of MAFA XB:

- The surface coating reduces the heat radiation in the silo.
- Longer service life. We provide a 10-year material warranty against rusting.
- Filling via a long radius bend and large cyclone provides gentle insufflation and optimal venting.
- Minimal friction as the inside is smooth, equipped with a special bolt.
- A wide range of auger boxes for different capacity are available.

Technical information

Model	Volume m ³	Height m
MAFA XB		
50° cone, 30° roof, ø - 4,69m		
XB86	86,1	9,6
XB107	106,7	10,8
XB127	127,7	12,0
XB148	148,0	13,2
XB169	186,6	14,4
XB189	189,3	15,6

ACCESSORIES

All MAFA silos can be equipped with various accessories to optimize the functions for the specific customer.
